# VALEA COYNE

MG-ALFA Consultant

valea.coyne@milliman.com

+1 206 504 5780

## Current Responsibility

Valea is a specialist on Milliman's Integrate actuarial projection software system and provides all Integrate technical documentation as well as software development and support. Valea is affiliated with the Seattle office of Milliman, having joined the firm in 1999.

## Professional Work Experience

Prior to taking on her current role, Valea was a software technician and developer. She has supported, designed, and tested actuarial and investment software for over ten years. She specializes in the modeling and projections of assets.

Valea entered the insurance profession in 1992 as an investment analyst and trader. During this time, she specialized in the modeling and projection of mortgage-backed securities, with an emphasis on collateral mortgage obligations. Over the course of her career, this experience broadened to cover all asset types.

Over the next three years, Valea was responsible for the quarterly ALM work, with a concentration on the projection software. Complete areas of expertise include cash flow testing, asset/liability management, and asset modeling.

## Education

- BS, Mathematics, Rutgers University
- BA, Economics, Rutgers University
- Duration Analysis and Portfolio Immunization Theory Intensive Training Course, University of Illinois, Champaign-Urbana

## Affiliations

Valea has been a moderator at Society of Actuaries meetings on software-related topics.
