Current Responsibility

Guy Avagliano is a principal and consulting actuary in the San Francisco office of Milliman. He is responsible for casualty actuarial consulting practices in San Francisco, Los Angeles, and Seattle.

Professional Work Experience

Guy has substantial experience with many property and liability lines of business, including workers' compensation, professional liability, and contractors liability. The actuarial services he provides his insurance and self-insurance clients include:

- Expert witness testimony and litigation support
- Statements of actuarial opinion on reserve adequacy for annual statements
- Statements of actuarial opinion on rate adequacy for workers' compensation
- Reserve and funding-level projections for public and private self-insureds
- Cost allocations
- Cost/benefit analysis of various reinsurance and excess insurance options
- Captive feasibility studies
- Legislative change analysis
- Rate, form, and class plan analyses and filings
- Probability level and present value analyses
- Retrospective rating and large deductible pricing
- Predictive analytics

Professional Designation

- Fellow, Casualty Actuarial Society
- Member, American Academy of Actuaries

Education

BS, Mathematics/Applied Science, University of California at Los Angeles

Presentations and Publications

Guy is a frequent speaker at local, national, and international seminars on loss reserving, ratemaking, and reinsurance topics.
