Current Responsibility

Stoddard Davenport is a principal and healthcare management consultant with Milliman. He helps lead his practice's behavioral health and public health teams. His expertise is in helping organizations leverage data to advance healthcare delivery, including policy analysis, development and evaluation of healthcare interventions and strategies, and quantification of the impact of important public health issues. He joined the firm in 2011.

Professional Work Experience

Stoddard's experience includes assisting payers, provider organizations, associations, foundations, and state and federal agencies on a variety of important initiatives:

- Integration of physical and behavioral healthcare
- Research studies on priority populations and policy issues
- Development and evaluation of population health strategies to better allocate resources to patient needs
- Outcomes measurement for healthcare improvement efforts and interventions
- Burden of illness studies, including predictive modeling to identify unmet health needs or underdiagnosed conditions
- Mental health parity compliance reviews
- Behavioral healthcare cost and utilization benchmarks and projections
- Patient attribution and payment reform modeling to support value-based contracting

Stoddard has published extensively on the opioid crisis, mental health parity, and a range of other topics related to public health and behavioral health. Stoddard also leads the development of behavioral health cost and utilization benchmarks for Milliman's Health Cost Guidelines.

Education

- MPH, Dartmouth College
- BA (Summa Cum Laude), Economics, Boise State University
