

Darin Muse

ASA, MAAA

Consulting Actuary

Current Responsibility

Darin Muse is a consulting actuary in the Houston office of Milliman. He joined the firm in 2013.

Professional Work Experience

Darin's areas of expertise include commercial health insurance, Medicare Advantage, Medicaid, and provider consulting.

After graduating from the University of North Carolina at Chapel Hill, he worked as a pricing actuary at a large insurance carrier. There he gained significant experience in commercial health product development and pricing, regulatory rate filings, and disease/case management programs, as well as in the assessment of early impacts of health insurance reform. In 2010 he began consulting at a regional actuarial consulting firm where he gained valuable experience outside of the health insurance arena with life and annuity products, valuation, financial reporting, and acquisitions.

At Milliman, Darin has played an integral role in developing and pricing health benefit exchange products and Medicare Advantage and Part D bids for submission to the Centers for Medicare and Medicaid Services. He has also assisted provider clients with member attribution, risk sharing settlements, and in determining equitable funds flow methodologies.

In 2018, Darin left Milliman and spent 18 months at a large Medicaid Managed Care Organization. During this time he worked closely with clinical staff to build and assess models of care around acute conditions and chronic diseases, and employed root-cause analysis techniques to isolate impactable drivers of medical and pharmacy claims trend.

Professional Designation

- Associate, Society of Actuaries
- Member, American Academy of Actuaries

Education

BS, Mathematical Decision Science, University of North Carolina at Chapel Hill
