Current Responsibility

Bill Walton is an implementation manager and healthcare technology consultant in the Seattle office of Milliman. He is responsible for development and implementation of MedInsight products and services, primarily focusing on business intelligence and OLAP reporting.

Professional Work Experience

Bill has more than 16 years experience designing and implementing data warehouse and analytic solutions. With more than seven years independent consulting experience, Bill has developed analytic and business intelligence reporting systems for client suchs as Group Health Cooperative, Prudential Healthcare, Caremark, Amgen, and Nordstrom.

Bill specializes in OLAP reporting, developing business intelligence systems enabling fast access to multidimensional data, giving decision makers the tools necessary to make timely, accurate business decisions.

Education

BS, Computer Science, California State University
